Introducing Hospitals Without Walls & Home Health Collaborative Alliance

Home Health Collaborative Alliance™ is composed of a group of home health service providers. These service providers include, but are not limited to, Home Healthcare Agencies, as well as Palliative and Hospice Care Providers.

The current service area of the care providers associated with HHCA is expanding throughout the State of California.

Among the various strategies of HHCA for improving the quality of healthcare delivery is the collaborative implementation of Quality of Life Improvement and Life Extension Programs, for the elderly, developed by Hospitals Without Walls™.

We invite responsible, forward-thinking, caring healthcare providers to contact Home Health Collaborative Alliance to explore various potential win-win collaborative working relationships. These types of professionals involved in the mobile healthcare field may be Home Health, Hospice, and Palliative care administrators and directors, or individual providers, such as nurses, physical therapists, occupational therapists, speech therapists, clinical social workers, diagnostic company directors, or any other professional who is in some way involved in the Home Health services industry.

Hospitals Without Walls™

Hospitals Without Walls™ is a collaboration of healthcare providers who seek to transform healthcare service delivery by focusing on prevention of illness, improving the quality of life, and extending life, instead of only managing pre-existing illness.

Hospitals Without Walls™ provides mobile healthcare through its collaborative partnerships with various entities, such as the Home Healthcare Collaborative Alliance™. HWW is always looking for highly skilled and educated healthcare professionals who can function as contracted consultants, collaboratively enhancing the various programs of HWW.
